

Install and Configuration of Zoiper on Android

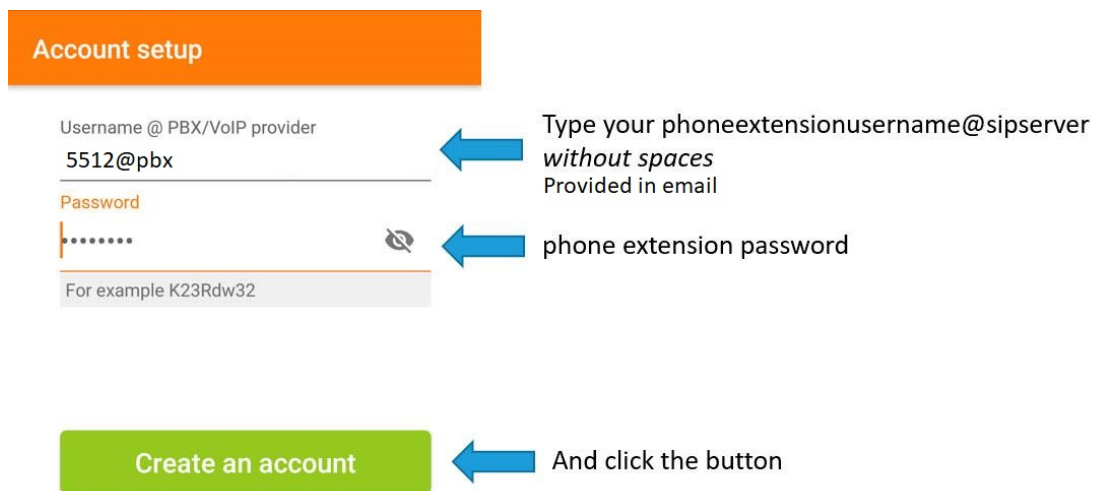

Now go to Google Play Store and install Zoiper App.

When you open Zoiper, accept the Terms and you'll see the welcome screen.

On the first field type with no spaces your phone extension username followed by the "@" symbol and then the SIP Server. (Provided in Email)

On the field below type your password. (Provided in Email)

On the next screen, you'll see your SIP Server name again, leave it like that and click next.

Account setup

Username @ PBX/VoIP provider
5512@pbx

Password
.....

For example K23Rdw32

Create an account

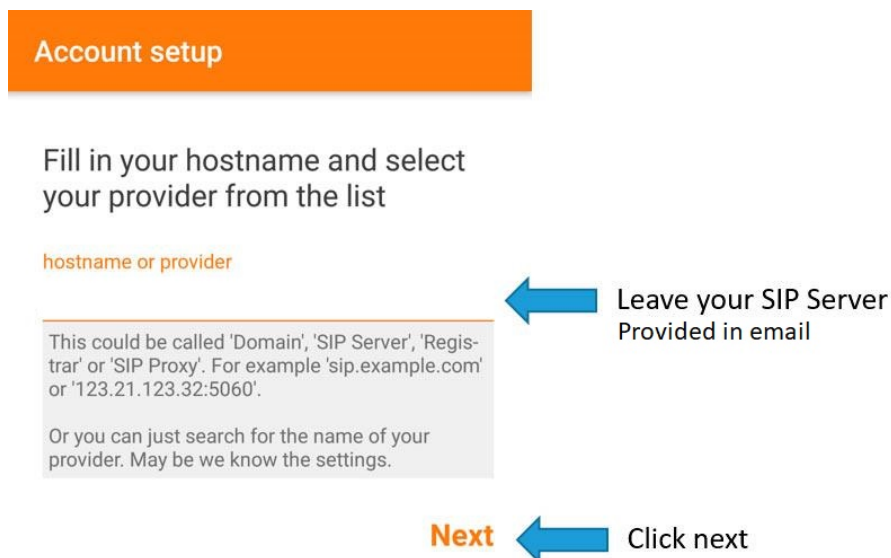

Type your phoneextensionusername@sipserver
without spaces
Provided in email

phone extension password

And click the button

PBX Hostname

Now write the authentication name and leave empty the Outbound proxy.

Account setup

Fill in your hostname and select your provider from the list

hostname or provider

This could be called 'Domain', 'SIP Server', 'Registrar' or 'SIP Proxy'. For example 'sip.example.com' or '123.21.123.32:5060'.
Or you can just search for the name of your provider. May be we know the settings.

Leave your SIP Server
Provided in email

Next Click next

Zoiper Configuration Test

The Zoiper config will perform tests and find your SIP server; click Finish.
